Why choose Hybrid Vinyl flooring?

Hybrid flooring has become an appealing option for interior decorators and homeowners. The intrinsic benefits of a Hybrid floor mean they are well suited to wet areas, are quiet and comfortable to walk on, are generally tolerant of abuse and relatively forgiving of imperfect subfloors. Not surprising, Quick-Step extends these natural benefits to deliver a floor that surpasses all others

What makes Quick-Step Hybrid Vinyl so unique?

When you're living your best life, you want a floor that can withstand anything. Quick-Step Hybrid Vinyl is expertly designed and produced by our team in Belgium, so you don't have to compromise on design or performance. Combining robust practical features with exquisite surface detailing, you'll have worry-free, high-performing, beautiful floors. What could be better?

Discover our three distinct features that will make you fall in love with Quick-Step Hybrid Vinyl.

1. UNRIVALLED BEAUTY

Looking at our Hybrid Vinyl floors, you will struggle to believe it's not real wood. Using our revolutionary technology our floors have a hyper-natural surface design, recreating a feeling of nature in your home. From walking in woodland to picking flowers in a forest, nature gives us the respite we need from our busy lives and inspires us when creating our designs.

2. WONDERFULLY SILENT

After a busy day you deserve to come home to peace and quiet. From kids running around, to clatters from mishaps in the kitchen, there's usually some sort of noise going on. Quick-Step Hybrid Vinyl helps you to switch off. Our sound-reducing floors will give you the perfect sanctuary to unwind. Sound good?

AVMPU40318

3. INNOVATIVE WATERTIGHT TECHNOLOGY

In a home full of life there's bound to be accidents, but thanks to our watertight click-system, you can cope with spills. Water can't seep through the joints so your subfloor will stay completely dry. Our technology prevents dirt and liquid reaching your subfloor that can lead to mould and an unhealthy indoor environment.

AVMPU40318

Unrivalled beauty

Our revolutionary surface technology gives the most natural looking hybrid to date. Taking inspiration from nature, our Belgian floor designers are committed to searching for the perfect original piece of wood to base their designs on. Not only will your floors look right on-trend but they're hard to tell apart from the real thing.

AVMPU40318

Designs to inspire

We know you want to make your home look good so our new collections are sure to inspire. Whether you like natural-looking wooden planks or a contemporary herringbone design we have the perfect floor for you.

Extra matt surface

At home everyone should feel free to be themselves, from children playing and running around, fun at family get-togethers, to pets doing what they do. Our top performing matt lacquer features excellent stain and scratch resistance so you don't need to compromise on performance or beauty.

AVMPU40318

True-to-nature design

The natural knots and grain in your Quick-Step Hybrid Vinyl floor are so authentic you won't know it from real timber. Thanks to revolutionary technology, Quick-Step Hybrid Vinyl has an authentic depth structure which makes its surface hyper-natural. Allowing all the performance you'd expect from vinyl together with our superior, detailed design.

AVMPU40318

Wonderfully silent

With better soundproofing than traditional flooring, Quick-Step Hybrid Vinyl is the ideal flooring for a home full of life. Engineered with multiple layers, you'll have the quiet and calm you deserve, away from the hustle and bustle of daily life.

Next to that, the integrated underlay will also reduce the sound towards neighbouring rooms and levels.

Brilliantly quiet

Our unique soft layer (A) minimises everyday sounds like children running around and heels clacking on the way out to work.

The integrated underlay (B) is able to reduce impact noise to neighbouring rooms by up to 21 decibels, making the floor even quieter. And for those that live in an apartment, this means not disturbing the neighbours below when inviting guests around.

There's more!

Not only does the underlay reduce sound, but thanks to our unique production it fits snugly at every join so you don't have to worry about gaps. This ensures a perfectly supported click-system and improved sound dampening.

And did you know, our floors remain internally recyclable even with the attached underlay? So you can feel good about choosing flooring that commits to fully re-integrate production waste. See page 22-23 for more information on our commitment to sustainability.

AVMPU40318

AVMPU40318

Innovative watertight technology

Spilled water on your floor? You don't need to worry about raised edges or swollen planks. All of our components are 100% waterproof. Make your dreams a reality in your favourite rooms – even in challenging areas like the kitchen.

On top of that, our watertight Hydroseal technology, in combination with the Uniclic or Unizip system, fully closes the joints between the planks. This makes the floor surface entirely watertight and prevents dirt and bacteria from settling in the subfloor. Our engineered click-systems are designed for maximum ease of installation, it's simply click and go! To guarantee a super strong, watertight connection with speedy, user-friendly installation, our Uniclic and Unizip click-systems with interlocking tongue and groove offer the best technical performance on the market.

/// QUICK-STEP

Our Hydroseal technology, in combination with the Uniclic or Unizip system, fully closes the joints. Making the floor surface entirely watertight, and preventing dirt and water seeping through the joints, avoiding damage to your subfloor.

COMPETITION

Weaker click-systems and no Hydroseal technology mean water and spills can get through the joints. This leads to dirt and damage to the subfloor.

Unizip

Creating a herringbone pattern? Ordinarily, you'd need two different types of planks, A and B, which would mean slower and trickier installation. Not with Quick-Step Cirò. Our herringbone floor has one ingenious type of plank that clicks on both sides, thanks to the Unizip system. You'll have a beautiful new herringbone floor in no time!

Beauty comes in various forms

PLANKS

Sustainability at the heart of your home

We all love natural beauty. The only way to continue to enjoy the beautiful things our planet has to offer is to treat it with respect. That's why our flooring products not only look good, but are as hard-wearing and sustainable as possible. Together, we can reduce our ecological footprint, from the production of your flooring to the end of its life.

Clean indoor air

Most of your life takes place indoors, which is why the air quality in your home is so vitally important. Many factors have an effect on it: ventilation, candles, cleaning agents, and even the materials used in your interior, such as the flooring. That is why we minimise our emissions of harmful substances and have reduced them **lower than the European standard**. What's more, you don't

need any aggressive cleaning products to keep your hybrid flooring clean. All you need is lukewarm water and, if necessary, some Quick-Step Floor cleaner product.

The following labels demonstrate that your flooring complies with the strictest environmental and health standards:

The highest guarantee for the air quality in your home.

International building classification programme for low-emission products.

The proof that our flooring products do not release toxic substances and are odourless.

This SCS label shows that your flooring meets low-emission product requirements.

Consciously selected materials

All Quick-Step Hybrid Vinyl floors are manufactured in Belgium. The raw materials come mainly from neighbouring countries. Hybrid flooring can contain up to 40% **chalk**, a material that is and will remain available in abundance. Another quarter of our hybrid vinyl is made from **recycled PVC** from our own production waste. Only one quarter is made from what is known as '**virgin**' or **new PVC**. The remaining ingredients – primarily **additives** – do not contain any harmful substances. The plasticisers we use to make your flooring flexible are the same as those used in children's toys and food packaging and are, therefore, **100% ortho-phthalate-free**.

Green production

We take every opportunity to make our production processes greener. For this reason, we joined the **European Energy Efficiency Programme**, which aims to implement as many energy-saving measures as possible and monitors all efforts from day to day. Furthermore, 70% of the heat we use in our production unit is generated from wood residues and dust from our nearby lamination site. This helps us to save 25,000 tonnes of fossil CO₂ emissions per year.

Circular ecosystem

We recycle 99% of our own industrial waste through our internal production process. This means we do not burn or dump materials unnecessarily, and we create our own circular ecosystem.

WORRY-FREE INSTALLATION

Did you find your dream floor? The Quick-Step Uniclic system ensures a quick and easy installation, even in tight corners. On top of that, all Quick-Step Hybrid Vinyl floors can be installed over traditional underfloor heating, and even on stairs!

**Check out our installation tips and
videos at [quick-step.com.au](https://www.quick-step.com.au)**

ACCESSORIES

INSTALLATION

Installation set
QSTOOLA

Set with a tapping block to easily click planks together, a cramp iron for hard-to-reach places and spacers to provide perfect expansion joints (8 mm) between walls and floor.

TOOLS FOR A WATERTIGHT FINISH

Give your floor a watertight finish using our Foamstrip and Hydrokit to get your water-resistance warranty. Follow the installation instructions and consult the warranty conditions for more details.

Foamstrip
NEVRFOAMSTRIP15
15 m x 8 mm x 5 mm

Fill up expansion joints with the Foamstrip and combine with the Hydrokit for a watertight finish of your floor. Invisible installation under skirtings, profiles etc.

Hydrokit
QSKITTRANSP
310 ml

Transparent silicone to combine with the Foamstrip for a watertight finish of your floor. Invisible installation under skirtings, profiles, etc. Average use: 1 tube for 15 m.

FINISHING

Why choose Quick-Step colour-matched profiles?

PERFECTLY MATCHING COLOURS

Our profiles flawlessly match the colour of every floor.

SCRATCH-RESISTANT TOP LAYER

Profiles are protected against everyday wear and tear.

QUICK-STEP WARRANTY

Profiles come with the same warranty as your floor.

Vinyl stair profile - bullnose
QSVSTRBMP(-)
1474 x 136 x 54 mm

Durable vinyl tread cover with a bullnose stair nosing to cleanly finish your stairs. Since stair profiles are made out of your floor's material, the colour matches 100%. Easy glued-down installation.

Scotia
QSVSCOT(-)
 2400 x 15 x 15 mm

Use in combination with the PE Foamstrip, Hydrokit and Hydrostrip for a 100% waterproof finish.

Paintable waterproof flexible skirting
QSFLEXSKR
 14 x 40 mm

Flexible, paintable skirting made of foamed PVC that can be cut to your desired length. Ideal to finish pillars or curved walls. Use the Foamstrip and Hydrokit for a watertight finish in damp rooms. Easy to install with contact glue.

Incizo profile
QSVINCP(-)
 2000 x 45 x 8 mm

Multifunctional finishing tool to finish your floor and stairs in matching colours. Simply cut the Incizo basic profile to the desired shape with the supplied Incizo knife. Use the Foamstrip and Hydrokit for a watertight finish. Patent pending. Contains 1 Incizo profile, 1 Incizo knife and 1 plastic rail.

APPLICATION 1
 Connect two floors of different heights.

APPLICATION 2
 Connect two floors of the same height.

APPLICATION 3
 Finish your floor along walls or windows.
 Cut in half to cover twice the distance with one profile.

APPLICATION 4
 Create a nice transition between your Quick-Step Hybrid floor and other flooring types or finish along sliding windows.

MAINTENANCE

Cleaning product
QSCLEANECO1000
1 L

Cleaning product specifically developed for Quick-Step floors. Cleanses the surface thoroughly and safeguards its original appearance to maximise that 'new floor' experience. Average usage: 1 L for 15 cleaning sessions.

Cleaning kit
QSSPRAYKIT

Mop holder with refillable water tank and handy lever to easily moisten and mop your floor. Also includes a washable microfiber mop and 1 L of Quick-Step Cleaning product. A sustainable choice to clean your floor.

Cleaning mop
QSSPRAYMOP

Microfibre mop washable up to 60 °C. Compatible with the Quick-Step Cleaning kit.

Repair kit
QSREPAIR

Kit to easily repair light damage and renew the original colour of your floor. Find detailed instructions at quickstep.com.

quick-step.com.au
